

A Rowe (Victoria)

C & B Gearing (Western Australia)

A Rowe (Victoria)

Class 6 Lutino

Judges comments on class:

Leading group of birds - Very pleasing – good colour and style.
Next group – quality but carrying suffusion.

1. Strong solder and face
2. Very strong bird. Nice length, feather above head. Tends to drop tail when nervous.

3. Solid bird – good width of face but needs more feather over top and back.
4. Good long bird – little too nervous.
5. Beautiful hen, but suffused.

Judges comments (recorded by Carol Gough):

Top 4 birds are very nice birds with excellent variety and appealing feather.

First place is very pleasing with good head, face, and overall a very good variety and a very pleasing bird.

Second place is extremely showy with nice length and feather but has a tendency to be a bit nervous and drops its tail slightly.

Third has a good solid body with good face width, feather direction across the eye and across the head.

Fourth is a little narrower than the ones above it.

Fifth is showing suffusion coming through the body but a striking hen.
